**Portfolio:** https://anujpanveli.github.io/AnujPanveli_Portfolio_Latest/

## PROFILE

Java Developer with 6 years of commercial experience delivering scalable, cloud-native, and high-performance backend systems using Java, Spring Boot, Microservices, and AWS. Strong background in building REST APIs, optimizing database performance, implementing CI/CD pipelines, and improving system resilience across enterprise environments. Known for writing clean, testable code, modernizing legacy systems, and collaborating effectively within Agile teams. Seeking roles as a Java Developer / Backend Engineer in the United Kingdom.

## KEY ACHIEVEMENTS

- Improved system performance and response times by 35% through microservice optimisation and API restructuring.
- Reduced deployment cycle time by 40% by implementing automated CI/CD pipelines using Jenkins and Maven.
- Migrated legacy systems to AWS, resulting in a 20% reduction in infrastructure costs.
- Raised code quality metrics significantly, improving automated test coverage to 90% using JUnit and Mockito.
- Increased data retrieval speed by 50% through SQL query optimisation and strategic caching.

## SKILLS

**Backend & API Development:** Java 8–17, Spring Boot, Spring MVC, Microservices, RESTful APIs, API Design, Authentication/Authorization (JWT/OAuth2), JSON, Swagger
**Databases:** MySQL, PostgreSQL, Oracle, MongoDB, SQL Performance Tuning, Hibernate/JPA
**Cloud & DevOps:** AWS (EC2, RDS, S3), CI/CD Pipelines, Jenkins, Git, Maven, Gradle, Docker, Logging & Monitoring (ELK), Kubernetes (basic understanding)
**Testing & Quality:** JUnit, Mockito, Integration Testing, Test-Driven Development (TDD), Postman
**Frontend (Legacy/Support):** JSP, HTML5, CSS3, JavaScript (basic)
**Other Skills:** Agile/Scrum, System Design, Scalability Engineering, Code Reviews, Architecture Patterns (MVC, Microservices)

**Technical Summary:** Java (8–17), Spring Boot, Microservices, REST APIs, AWS, CI/CD, SQL/NoSQL, Docker, ELK, JSP.

## EXPERIENCE

Visualising Software Solutions                                               *Camberley, United Kingdom*
Software Engineer                                                                      Mar 2023 – Jul 2024

**Responsibilities:**
- Developed and optimised Spring Boot microservices and REST APIs, improving throughput and reducing latency by 35%.
- Built backend modules using Hibernate/JPA, enhancing database access and improving SQL query performance across PostgreSQL and MySQL.
- Integrated secure third-party authentication, payments, and analytics services.

- Delivered high-quality code through comprehensive unit and integration testing (JUnit, Mockito), achieving 90% coverage.
- Automated build, test, and deployment processes using Maven, Jenkins and CI/CD pipelines, reducing deployment time by 40%.
- Deployed cloud-native services on AWS EC2, configured RDS, and performed infrastructure maintenance to ensure system reliability.
- Implemented centralised logging and monitoring using ELK, reducing troubleshooting time in production.
- Worked closely with Product Owners, QA, and DevOps teams within Agile/Scrum ceremonies.

**Tech Stack:** Java 11/17, Spring Boot, Microservices, Hibernate, PostgreSQL, MySQL, AWS (EC2/RDS/S3), Jenkins, Docker, ELK, JUnit, Mockito

Tech-N-Vision Ventures                                          *Hyderabad, India*
Software Engineer                                              Oct 2018 – Mar 2023

**Responsibilities:**
- Developed enterprise-scale financial applications using Core Java, Spring Boot, and Spring MVC, ensuring high performance and reliability.
- Designed REST APIs for transaction and account services, supporting high-volume, low-latency requests.
- Improved SQL performance by 50% through indexing, query optimisation, and caching (Redis/Local Cache).
- Modernised legacy monolithic applications by refactoring into distributed microservices, improving scalability and maintainability.
- Built and deployed applications using Docker, supporting containerised environments for better consistency.
- Developed CI/CD pipelines with Git, Jenkins, and Gradle, enabling automated updates and stable deliveries.
- Supported cloud migration to AWS, achieving a 20% cost reduction through resource optimisation.
- Developed UI screens using JSP/HTML/CSS3, implemented server-side rendering, validation, and reusable JSP components.
- Mentored junior developers and contributed to code reviews and design discussions.
- Collaborated with QA and DevOps teams to ensure smooth, high-quality production releases.

**Tech Stack:** Java 8/11, Spring Boot, Spring MVC, JSP, HTML5, CSS3, Hibernate, MySQL, Oracle, MongoDB, Docker, Jenkins, AWS, Gradle, JUnit, Mockito

## EDUCATION
University of Greenwich                                          *London, United Kingdom*
**Master of Science** in Computer Science                                    *2024* - 2025

Bharat Institute of Engineering and Technology                              *Hyderabad, India*
**Bachelor of Science** in Information Technology                              *2014* - 2018

## ADDITIONAL INFORMATION
- Eligible to work in the United Kingdom (Graduate Visa).
- Available for immediate interviews and joining.
- Open to hybrid and on-site roles across United Kingdom.
